SUMMARY

Data Analyst and Data Scientist with a Master of Data Science (University of Melbourne), spanning business intelligence, people analytics, and applied AI. At John Holland, led a 4-person team to deliver a 91%-accurate workforce retention model across 600,000+ HR records using social network analysis and predictive modelling. Independently designed, built, and deployed four end-to-end projects: a Power BI dashboard, an automated data pipeline with CI/CD, a RAG-based AI extraction system, and a clinical ML model. Strong technical foundation paired with genuine people leadership, from stakeholder-facing delivery to training and coaching teams to real results.

SKILLS

Analytics & Reporting: Power BI | DAX | SQL | Data Modelling | Data Storytelling | Tableau.

Data Science & ML: Predictive Modelling | Statistical Analysis | Social Network Analysis | Agent-Based Modelling.

AI & LLM: RAG Architecture | LangChain | LLM Integration | Prompt Engineering.

Data Engineering: Python | dbt | Apache Airflow | Docker | CI/CD (GitHub Actions) | pytest.

Cloud Platforms: Microsoft Azure (Fabric) | Google Cloud Platform (BigQuery).

Stakeholder & Delivery: Requirements Gathering | Stakeholder Management | Data Governance.

PROFESSIONAL EXPERIENCE

Data Science Intern

Feb 2024 - Oct 2024

John Holland Group, Melbourne, Australia

- Led a 4-person analytics team as primary stakeholder point of contact across John Holland and University of Melbourne, clarifying requirements and setting delivery timelines.
- Resolved data accuracy issues across 600,000+ HR records (duplicates, schema drift, mismatches) by designing repeatable data governance standards.
- Applied social network analysis to employee demographic data, identifying mid-level employees as disproportionately significant organisational influencers.
- When our initial approach didn't meet academic stakeholder standards mid-project, led research and consultation to redesign the methodology into an Agent-Based Model simulating how influencer movement affected employee exits.
- Presented findings to an audience of 30 through case-study storytelling; the resulting 91%-accurate model directly informed workforce retention strategy.

Assistant System Engineer (Data & Reporting)

Aug 2021 – Dec 2022

Tata Consultancy Services, Bengaluru, India

- Introduced evidence-based root cause analysis on production banking systems for a regulated client (Deutsche Bank Belgium), cutting mean time to resolution by 95%.
- Coordinated directly with Deutsche Bank Belgium stakeholders during UAT deployments, ensuring smooth sign-off and issue resolution ahead of go-live.
- Implemented structured data validation and monitoring, maintaining data integrity under compliance requirements and contributing to 99.5% application uptime.
- Investigated data discrepancies and reporting issues, supporting ongoing data quality and governance practices.
- Translated technical findings into operational improvements for cross-functional, non-technical stakeholders.

Floor Staff & Supervisor

April 2023 - Present

Toscano's of Kew, Melbourne, Australia

- Trained 15+ new hires on shop setup and closing operations procedures across shifts, improving consistency and quality of execution by 25%.
- Managed teams of 4-5 staff during high-volume Saturday shifts and 3 staff on Sundays, ensuring smooth service delivery under peak pressure while completing full-time postgraduate study.

PROJECTS

The Basis Point Live Bank Rate & Inflation Analytics Pipeline

June 2026 - July 2026

Personal Portfolio Project | Python | dbt | Apache Airflow | Docker | PostgreSQL | Streamlit | GitHub Actions CI/CD

- Built and deployed an end-to-end pipeline integrating Australian macroeconomic data (ABS Data API) with banking product data (Consumer Data Right APIs), orchestrated via Airflow and transformed with dbt, containerised with Docker.

- Engineered a self-correcting extraction process that adapts automatically to inconsistent source API structures, with pytest-covered unit tests and lint/test checks run via GitHub Actions on every push.
- Built automated data quality checks that caught and corrected a real data error before it reached the final live Streamlit dashboard.

Victoria Retail Turnover Analysis (2023–2025)

Jan 2026 - Feb 2026

Personal Portfolio Project | Power BI | DAX | Excel | ABS Data | Business Intelligence

- Designed and built a 5-page executive-facing Power BI dashboard analysing \$109B+ in Victorian retail turnover across 30 months and 10+ categories.
- Authored 8 custom DAX measures, including forecasting logic, surfacing a 2.9% annual growth trend and a \$12.1B December 2024 peak.

AI-Powered Invoice Data Extractor

Dec 2025 - Jan 2025

Personal Portfolio Project | Python | LangChain | FAISS | PyMuPDF | Streamlit

- Built a modular, class-based RAG pipeline extracting structured data from unstructured invoice PDFs: text extraction, chunking, FAISS vector embedding, and per-field similarity retrieval feeding a Groq-hosted LLM.
- Reached 90% end-to-end extraction accuracy across vendor, invoice, date, and line-item fields, with structured JSON output design and fallback handling; deployed on Streamlit Cloud.

AMI Classification & Troponin Prediction

July 2024 - Nov 2024

Academic Project | University of Melbourne | Python | SQL | Machine Learning | Google Big Query

- Extracted a clinical cohort via multi-table SQL joins across admissions, lab, and chart data.
- Evaluated KNN, Logistic Regression, and Random Forest models; Random Forest achieved 94% accuracy and 0.95 ROC-AUC.

LEADERSHIP & COMMUNITY

- Treasurer, Music Society, Guru Gobind Singh Indraprastha University. Managed society finances and coached team members in acapella performance; led team to a top-6 placement in the Delhi collegiate circuit.
- Performer, Melbourne Marars (Chenda ensemble) an ongoing performer at community cultural events across Melbourne, including Onam season celebrations.

EDUCATION

Professional Year Program (ICT)

Performance Education, Melbourne

May 2026 - Present

Master of Data Science

The University of Melbourne, Parkville, Melbourne

Feb 2023 - July 2025

Bachelor of Technology – Computer Science

Guru Gobind Singh Indraprastha University, Delhi, India

Aug 2017 - Jul 2021

PROFESSIONAL CERTIFICATIONS

- Claude Code in Action (Anthropic)
- CITI Program - Human Subjects Research (Clinical Data Governance & Ethics)
- Databricks Fundamentals Accreditation
- Databricks AI Agents Fundamentals Accreditation
