SUMMARY

Data Analyst and Data Scientist with a Master of Data Science (University of Melbourne) and a track record of turning complex, multi-system data into insight that drives real decisions. At John Holland, led a 4-person team as the primary point of contact for stakeholders, delegating tasks and setting deadlines to deliver a 91%-accurate employee turnover prediction model across 600,000+ HR records. Built and shipped four independent data projects spanning retail analytics, live API pipelines, and AI-powered document extraction, each solving a genuine, defined problem rather than serving as a technical exercise. Strong foundation in SQL, Python, and Power BI, with working exposure to data engineering tools (dbt, Airflow, Docker) and cloud platforms (GCP, Azure).

SKILLS

Analytics & Reporting: SQL | Python | Power BI | DAX | Tableau | Excel | Streamlit | Data Storytelling.

Data Science & ML: Statistical Analysis | Predictive Modelling | Feature Engineering | Random Forest | Logistic Regression | KNN | Agent-Based Modelling.

AI & LLM: RAG Architecture | LangChain | LLM Integration | Prompt Engineering Data.

Engineering (Working Knowledge): dbt | Apache Airflow | Docker | ETL/ELT Pipelines | PostgreSQL | API Integration | CI/CD (GitHub Actions).

Cloud Platforms: Google Cloud Platform (BigQuery) | Microsoft Azure (Fabric, Lakehouse).

EDUCATION

Professional Year Program (ICT)

May 2026 - Present

- Undertaking structured professional development to strengthen workplace readiness in the Australian ICT/data sector.

Master of Data Science

Feb 2023 - July 2025

The University of Melbourne, Parkville, Melbourne

- Delivered stakeholder-facing analytics projects translating complex, multi-system data into actionable organisational insights across technical and non-technical audiences.
- Developed expertise in data governance, spatial analytics, machine learning, and cloud-based BI platforms.

Bachelor of Technology – Computer Science

Aug 2017 - Jul 2021

Guru Gobind Singh Indraprastha University, Delhi, India

PROFESSIONAL EXPERIENCE

Data Science Intern

Feb 2024 - Oct 2024

John Holland Group, Melbourne, Australia

- Led a 4-person project team as the primary point of contact for stakeholders delegating tasks, setting deadlines, and coordinating delivery, while translating findings for senior, non-technical decision-makers.
- Resolved fragmented, inconsistent HR data across 600,000+ records duplicates, supervisor mismatches, schema drift by building repeatable data governance standards.
- Built organisational network graphs across 10,000+ employees using Python and NetworkX, calculating centrality metrics to identify retention-risk influencers.
- Developed an Agent-Based Model combining centrality metrics with HR data, achieving 91% prediction accuracy that directly informed workforce retention strategy.

Assistant System Engineer (Data & Reporting)

Aug 2021 – Dec 2022

Tata Consultancy Services, Bengaluru, India

- Introduced evidence-based root cause analysis on production banking systems for a regulated client (Deutsche Bank Belgium), cutting mean time to resolution by 95%.
- Implemented structured data validation and monitoring, maintaining data integrity under compliance requirements and contributing to 99.5% application uptime.
- Translated technical findings into operational improvements for cross-functional, non-technical stakeholders.

Floor Staff & Supervisor

April 2023 - Present

Tosciano's of Kew, Melbourne, Australia

- Managed operational pressure during closing shifts alongside full-time postgraduate study, delegating tasks to consistently meet service standards.
- Trained new hires and delivered consultative customer service during peak periods.

PROJECTS

Victoria Retail Turnover Analysis (2023–2025)

Jan 2026 - Feb 2026

Personal Portfolio Project | Power BI | DAX | Excel | ABS Data | Business Intelligence

- Built a 5-page executive-facing Power BI dashboard analysing \$109B+ in Victorian retail turnover across 30 months and 10+ categories.
- Authored 8 custom DAX measures including forecasting logic, surfacing a 2.9% annual growth trend and a \$12.1B December 2024 peak.

The Basis Point Live Bank Rate & Inflation Analytics Pipeline

June 2026 - July 2026

Personal Portfolio Project | Python | dbt | Apache Airflow | Docker | PostgreSQL | Streamlit | GitHub Actions CI/CD

- Built a fully automated pipeline pulling live data from government and banking sources to compare loan and savings rates against inflation in real time.
- Engineered a self-correcting extraction process that adapts automatically to inconsistent source structures.
- Built automated data quality checks that caught and corrected a real data error before it reached the final report.

AI-Powered Invoice Data Extractor

Dec 2025 - Jan 2026

Personal Portfolio Project | RAG | LangChain | LLM | Streamlit | Python

- Built a RAG pipeline to extract and structure data from unstructured invoice PDFs, reaching 90% extraction accuracy end-to-end.
- Deployed on Streamlit Cloud, estimated to cut manual data entry by 80-90%.

AMI Classification & Troponin Prediction

July 2024 - Nov 2024

Academic Project University of Melbourne | Python | SQL | Machine Learning | Google Big Query

- Extracted a clinical cohort via multi-table SQL joins across admissions, lab events, and chart data in BigQuery.
- Evaluated KNN, Logistic Regression, and Random Forest models; Random Forest achieved 94% accuracy and 0.95 ROC-AUC.

PROFESSIONAL CERTIFICATIONS

- Claude Code in Action (Anthropic)
- CITI Program - Human Subjects Research (Clinical Data Governance & Ethics)
- Databricks Fundamentals Accreditation
- Databricks AI Agents Fundamentals Accreditation
